

Volvo EX30

MODEL YEAR 2025

FULLY ELECTRIC

V O L V O

The Volvo EX30

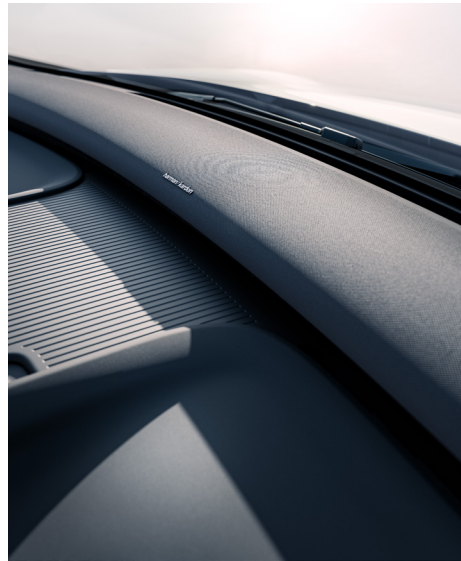

We are proud to introduce the EX30: our new, small fully electric SUV which takes Volvo Cars' unique approach to electric mobility to a new audience. The Volvo EX30 is a cornerstone of Volvo Cars' electrification strategy and key in delivering to the company's growth ambitions. Everything that has made our SUVs so appreciated and even loved over the years—the distinctive design, the generous interior, the inspiring drive, the advanced safety, the legendary comfort, smart connectivity and liberating versatility—you will also find in our new, small SUV EX30. In a more compact format, of course, but just as well a full-grown Volvo that gives everything people can expect from a fully electric Volvo SUV.

KEY FEATURES

New 12.3" Combined Driver/Center Display

The driver display integrated on top of the center display gives clear, instant driving critical information. Its high position means that it is always conveniently located in the driver's field of vision. The display features one mode with standard functions such as speed, battery level, range, actual road signs, gear lever position (PRND), and a real-time surround view with driver support functions such as Pilot Assist. The surround view is a car-centric view that displays your car and surrounding cars and trucks.

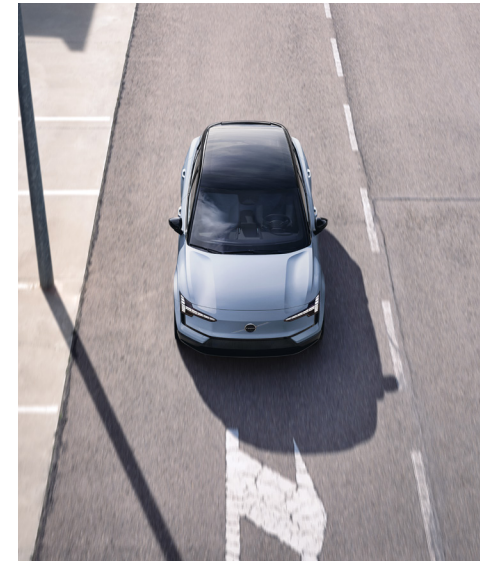

Luxury, High-quality Interiors

With the Volvo EX30, we introduce the soundbar speaker concept as standard. The soundbar elegantly integrates tweeters, mid-range speakers, and the woofer outlet in a stylish audio unit covering the full width of the dashboard in front of the occupants. Bringing home audio design into the car, the soundbar makes sound more driver-focused than ever and is an important part of the car's modern interior design impression. This speaker concept also frees up valuable space in the doors while reducing weight and material resources.

Scandinavian Design

Inspired by nature, it embodies Scandinavian design principles and provides a sophisticated, relaxing interior experience. An array of recycled and natural materials helps to reduce waste and optimize material utilization.

Safety

The safety expected from a Volvo in a smaller package, aiming for top safety rating with state-of-the-art collision avoidance technology and new safety innovations such as door opening alert and rear low-speed autobrake.

EX30 Models

Twin Motor Performance	
Plus	Ultra

EX30 Technical Features

Twin Motor Performance	
Seating Configuration	5-seater
High-Voltage Battery (kWh)	69 kWh
AWD System	●
Horsepower	422 hp
Torque	400 lb. ft.
Pure Electric Range (EPA)*	up to 253 miles**
Cargo Capacity V2 SAE Max	27.8 cu. ft.
Towing Capacity	2,000 lbs.

*The figures are based on EPA data obtained under specific testing conditions for the 2025 EX30. The real-life driving range and energy consumption achieved under real conditions varies depending on driving behavior and other external factors.

Twin Motor Performance models equipped with 19-inch wheels have an EPA-certified electric driving range of up to 253 miles (MPGe: 116 city/ 100 highway/ 109 combined), when the battery is fully charged and under ideal driving conditions. Your range and MPGe will vary for many reasons, including but not limited to, driving conditions, how and where you drive, how you maintain your vehicle, battery-package/condition, and other factors. Visit [fueleconomy.gov](https://www.fueleconomy.gov) for further information, **but please note information on the Twin Motor Performance models may not be published yet.
